RACGP 2011-2013 Triennium

Join other Sydney GPs in an interactive educational session by leading Macquarie University Specialists. As well as learning about developments in their respective fields, you will have the opportunity to raise questions and discuss issues with these specialists.

Registration commences at 6.30pm with drinks, followed by rotating presentations by specialists, with round-table discussions. Dinner will be provided. The event will conclude around 9.45pm.

Cardiac Health at Macquarie University Hospital

The Cardiac Health team at Macquarie University Hospital is made up of internationally respected cardiologists who offer a comprehensive cardiac health service. Using state of the art technology this team provides unsurpassed excellence in consulting, diagnostic and interventional cardiology. Services include complete on-site imaging, EP pacing and device implementation advice and expert guidance for preventative cardiac healthcare measures. Dedicated to delivering the highest standard in cardiac care our highly skilled team is committed to providing the best in patient focused cardiology.

PROFESSOR HOSEN KIAT

Professor Hosen Kiat graduated from Monash University and completed cardiology training at the Alfred and Austin Hospitals, Melbourne, and Westmead Hospital, Sydney. Throughout Dr Kiat's medical career, he has been an advocate of preventative healthcare. Professor Kiat is Head of Medicine and Cardiology at the Macquarie University School of Advanced Medicine, and is the Medical Director of Cardiac Health Institute, Sydney.

Topic: Detection of early CAD

Evidence from serial angiographic reports notes that subcritical stenoses are prone to rupture with ensuing presentation as acute myocardial infarction (MI). Early detection of nonobstructive CAD provides a long-term estimation of risk, which may guide the intensity of preventive strategies thus reducing lifetime risk of cardiac events.

DR ANIL AGGARWALA

Dr Anil Aggarwala is a medical graduate of Newcastle University, NSW, Australia. He completed his cardiology training in 1990 and has worked as a consultant Cardiologist in Sydney for 21 years. He has special expertise in interventional cardiology and is interested in preventative cardiology. Dr Aggarwala is a Director of the Cardiac Health Institute and the Director of the Macquarie University Hospital state of the art angiography suite.

Topic: Angioplasty in 2011

Ischemic heart disease (IHD) and associated complications are increasing in most western countries. This talk will discuss an increase in indications for angioplasty and stenting and aims to increase awareness of newer antiplatelet agents that can be used in the treatment of IHD.

DR PROBAL ROY

Dr Probal Roy is a consultant and interventional cardiologist practicing at the Cardiac Health Institute, Concord Repatriation General and Macquarie University Hospitals. He has trained in interventional cardiology both in Australia and USA (Washington DC). He has interests in clinical research and has authored a number of publications on topical issues in the field of interventional cardiology. He holds a Master of Public Health in Clinical Research Methods from Johns Hopkins University, Baltimore, USA. He is committed to teaching and clinical research along with striving for optimal cardiovascular patient care.

Topic: Dual anti-platelet therapy post PCI-issues for primary care physicians

Percutaneous coronary intervention (PCI) is now the predominant revascularization method in patients with coronary artery disease. To prevent adverse outcomes post PCI dual anti-platelet therapy is critical.

DR IMRAN KASSAM

Dr Imran Kassam is a consultant cardiologist at the Cardiac Health Institute and Macquarie University Hospital. He completed his training, specialising in Cardiology, at St Vincent's Hospital in Sydney. His study in Cardiology incorporated fellowships in Heart Failure, Transplantation and Electrophysiology and Device Therapy.

He specialises in patients with heart failure, syncope, palpitations, chest pain, arrhythmias such as Atrial Fibrillation and is heavily involved in routine checks for risk factor modification.

Topic: Heart Failure and CRT

Heart failure is a progressive disorder in which medical therapy has clearly improved prognosis over the years but there is an obvious need for further intervention. CRT (cardiac resynchronization therapy) has provided the new frontier in the treatment of heart failure.
